

Knapsack – BART-CBO vs GA

BART-CBO – Best Feasible Objective vs. BO Iteration

Mean $\pm$ 1 SD across 10 instances (ribbon). Carried forward from first feasible solution.

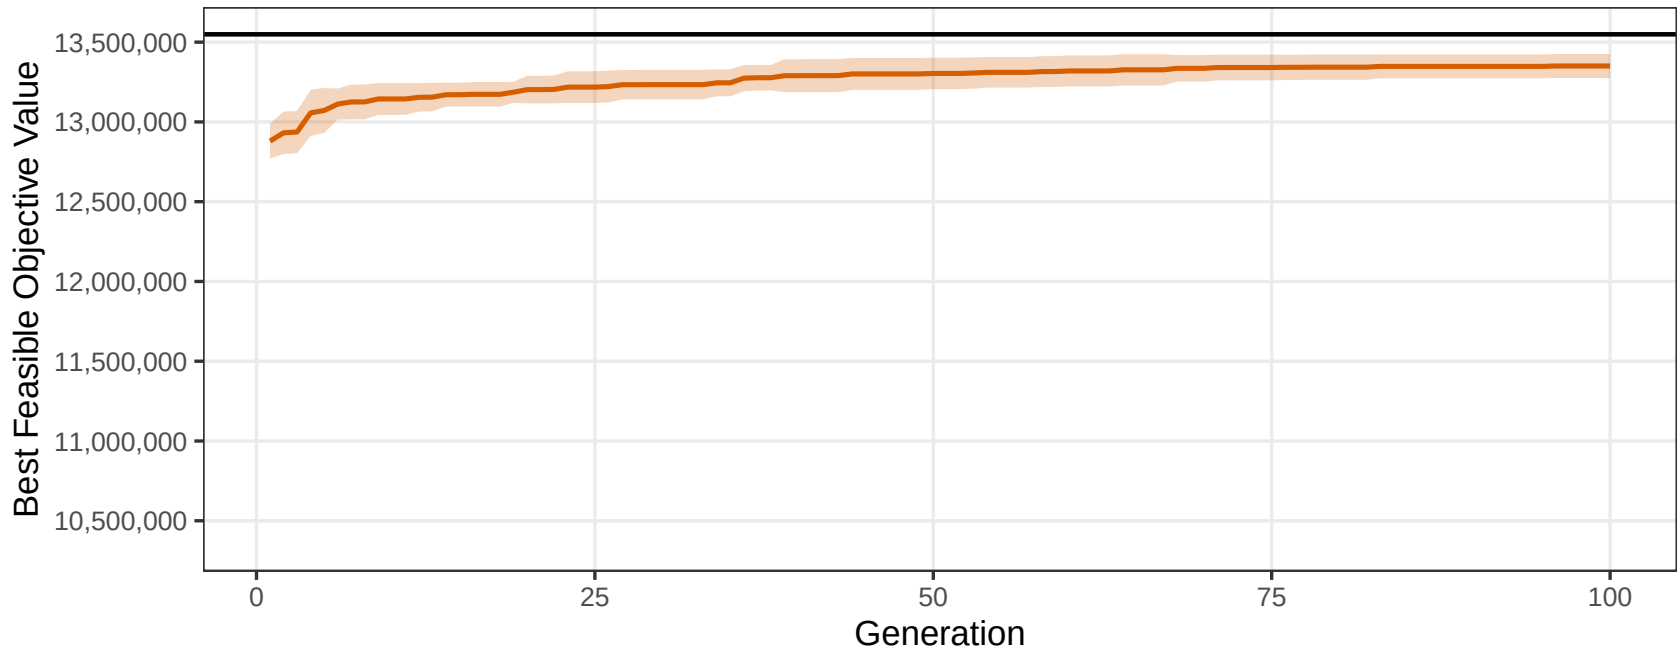

Method

- Penalty = 0.1
- Penalty = 1
- Penalty = 2
- Penalty = 5
- Penalty = 10
- True Optimum (GLPK)

GA – Best Feasible Objective vs. Generation

Mean $\pm$ 1 SD across 10 instances (ribbon). Carried forward from first feasible generation.

Method

- GA
- True Optimum (GLPK)
